

NEW ENVIRONMENTALLY FRIENDLY PACKETTES

Introducing a new multi-use SPF 30+ sunscreen packette to replace the Environmentally Un-friendly Sunscreen Wipes.

Our All Natural Zinc Oxide Sunscreen is applied in a lotion form, which means you can evenly apply overexposed areas of the body.

The Paper Bottle Packette is made up of green recycled material that once opened, can be closed and used a second time. This means to the outside worker that he is only throwing away one recycled package, rather than tossing four pieces of toxic packaging, ultimately damaging the environment.

It has been proven by the Environmental Working Group, out of Washington DC, that natural Zinc Oxide provides the best protection against High UVA rays that cause cancer and aging.

ALL DAY PROTECTION

- Environmentally Friendly
- Recyclable
- All Natural Zinc Oxide Sunscreen
- Not Animal Tested
